The official said that the project focuses on Hengshui education industry and tourism industry, and cultivates the development of big data and VR application industry as the main direction and characteristics. It is built in the fields of talent training, innovation and entrepreneurship, smart city and industrial application of big data and VR technology. Hengshui City big data dual-creation headquarters base, VR+AR ecosystem, build Hengshui big data VR digital innovation industrial park ecosystem, accelerate the agglomeration effect of various related industries, deepen the integration of big data, VR and various industries, and promote Hengshui education. The integration of tourism and other industries and the VR industry will create a demonstration zone for the development of big data VR industry in Hebei Province, realize the optimization and upgrading of the urban area of Hengshui Center, and promote the rapid development of Taocheng City to digital cities and smart cities.

According to the official, the project relies on big data and VR technology to realize smart management and smart operation in various industries in Hengshui City. Focusing on big data VR talent training and education, we will focus on creating the influential Hengshui International Digital Education Center, Big Data Double Creative Talent Incubation Base, and VR Digital Innovation Industrial Park. After the project is completed, it will become a characteristic town integrating VR investment, entrepreneurship, work, display, experience and tourism. It will provide talent support for the development of Xiong'an New District and Beijing-Tianjin-Hebei emerging industries, and lead Hengshui to build livable and suitable. The new height of the future value of the smart city. (Finish)
